

Challenges faced by people who use personal assistants

Challenges faced by people who use Personal Assistants since March 2020

People who use Personal Assistants (PAs), and groups who support them, have worked together with the Local Government Association and Think Local, Act Personal to design this survey to understand the challenges people who use PAs have been facing since March 2020, particularly in recruiting (finding) and retaining (keeping) Personal Assistants.

The survey is aimed at all people who employ Personal Assistants (PAs), or who are supported by a self-employed PA, and who pay for their PA with a Direct Payment, Personal Budget, Personal Health budget or from their own money.

A "Personal Assistant" or "PA" is a person who provides support services but is not provided through a care agency. Private support workers and private care assistants are also types of Personal Assistant.
